

The Bekaert and ArcSite Collaboration

Less Time Quoting. More Time Building.

Preloaded and Ready to Go

We've spent hours building hundreds of fencing bundles and Bekaert products into ArcSite so you don't have to. Get started with prebuilt templates and start quoting in no time flat.

Bekaert is proud to be the first agricultural fencing manufacturer to partner with ArcSite, creating a seamless bridge between our product knowledge and your business: quoting, bidding, customer communication and project visualization.

After rigorous development and real-world testing with contractors, we've crafted a platform that truly understands your business challenges.

Trusted by Fencing Experts Nationwide

- Visualize project sites
- Track jobs
- Manage invoices
- Quote faster

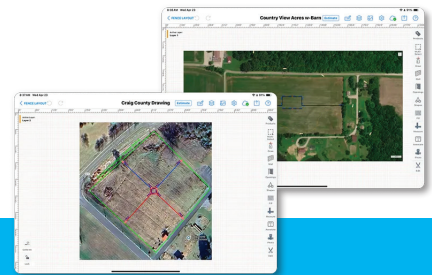

This powerful collaboration empowers fence professionals like you to slash errors, **save valuable time and consistently win more profitable projects.**

Now, your entire operation can flow through one system – meaning less time buried in paperwork and more time building profitable fence lines.

Accurate, Fast and Professional Site Drawings

ArcSite's Drawings from Satellite Maps feature allows you to start your fence design directly from a real-world satellite image. Instantly visualize the project site, capture dimensions and create precise layouts – all while automatically calibrating your drawing's scale.

Tech Advantages:

- Skip site sketching and reduce errors
- Instantly mark up photos and PDFs
- Mobile-friendly for field work
- Easily generate scaled layouts

How It Works:

1

Enter the jobsite address or use GPS to locate your site

2

Zoom and define your project boundaries

3

Capture the map image – ArcSite calibrates the scale for you

4

Start drawing over the satellite view in minutes

“If you need a quick drawing tool that also breaks down P&L ... ArcSite is a huge part of our business.”

– Robert Whittaker,
Nevada Fence

More Than Just Drawings

Remote estimates made easy | No more wasting hours on the road just to measure and quote.

Accurate Material Lists
No more over-ordering or rework.

Professional Presentations
Earn client trust and confidence.
